Additions

- Title of the person who has logged into the system example manager admin sales rep **Done**
- A back option that allows the system user to navigate back to previous page. **Dnt noe wc browser ur using**
- The product list should not be the same as the dept, the manager should be able to add a new product to any dept (first the manager should select the department that the new product will go into) **WIP**
- The sales rep should be able to select the product he intends on selling then stocks will be deducted from that products stock level.(on the add sales option I should be able to choose the product being sold **WIP**
- In the sales rep account the comments table should be enlarged (not easy to read the comments from the manager), and the under the comment tab the sales rep should be able to read the name and access level of the person who issued the comment **done**
- The manager should be able to delete a product from the product list **WIP**
- Can pictures be added to the home page of the system that have to do with IT related material such as networking material and servers etc. **please provide the pictures**
- can the size of texts be increased in the system **just zoom**
